### **New QP Annex Clinic in MIC**

Dear All,

Qatar Petroleum (QP) continues to work closely with the Ministry of Public Health (MoPH) and our business partners to combat the spread of the coronavirus (COVID-19) to protect the health of the workforce and maintain business continuity.

In support of these efforts, QP has opened a new annex clinic in Mesaieed Industrial City (MIC). The new clinic is open on a 24/7 basis for the assessment and management of suspected cases of COVID-19. A map showing the location of the new clinic in MIC is attached.

If individuals working within MIC experience symptoms such as fever, cough, difficulty breathing or other flu-like symptoms, the MIC Emergency Response Coordination Centre (ERCC) must be contacted by dialing the hotline number 135 (and pressing 1 for MIC).

The ERCC operator will arrange with the caller to have the person experiencing symptoms transported to the new annex clinic for further medical evaluation, and if necessary, COVID-19 testing.

We kindly ask that individuals within MIC that experience the symptoms described above to refrain from approaching the main QP Healthcare Centre.

If you have any questions regarding the process for reporting, transport or management of a Suspected Case, or if you require other information pertaining to COVID-19 and QP's protocols as they pertain to MIC, please do not hesitate to contact the QP HSSE Manager (MIC).

Best Regards,

**Salem Abdulrahman Al-Wehaibi**  
**Manager, Mesaieed Industrial City**
